

HEALTHCARE PERFORMANCE ANALYTICS

Identifying trends in a healthcare dataset

By Chime Chidinma Sylvia

PROBLEM STATEMENT

The core problem addressed in this analysis is the difficulty faced by healthcare organizations in monitoring performance across patients, physicians, procedures and revenue streams simultaneously.

OBJECTIVES

- To identify which insurer payer has the most outstanding debt.
- To determine the highest performing physicians.
- To ascertain the top performed procedures.
- To find out the hospital location that handles the most patient.

HEALTHCARE PERFORMANCE ANALYTICS

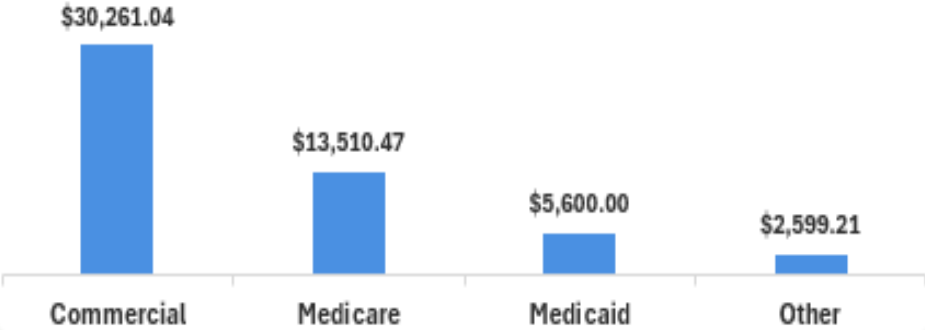

Gross Charges
\$1.47m

Total Revenue
-\$703,613.29

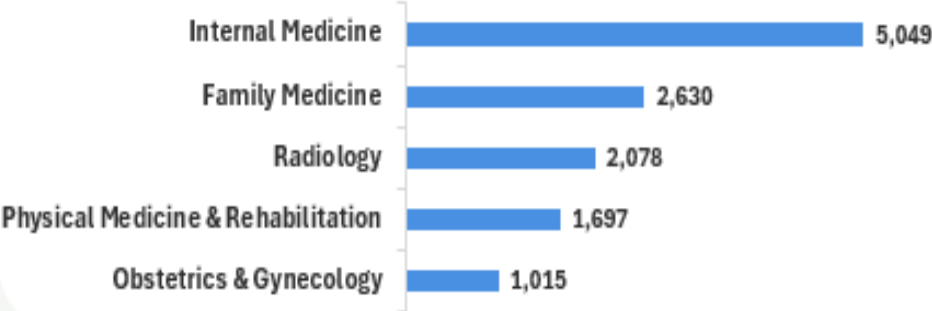

Total Patients
5,117

Total Physicians
932

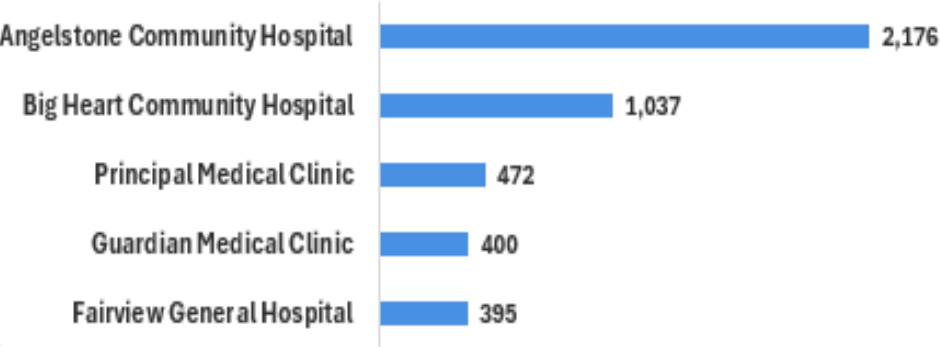

Total amount owed per insurer

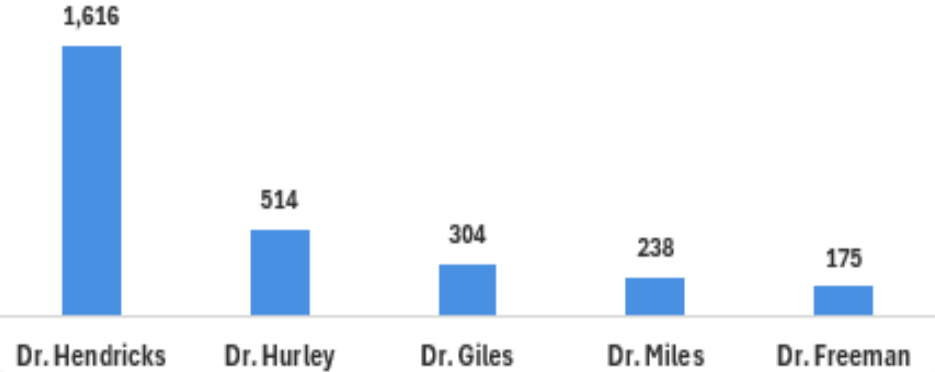

Top Performed Procedures

Location handling the most patients

Top 5 performing physicians

Location Name

Angelstone Community Hospital

Big Heart Community Hospital

Fairview General Hospital

Guardian Medical Clinic

Principal Medical Clinic

Physician

Dr. Freeman

Dr. Giles

Dr. Hendricks

Dr. Hurley

Dr. Miles

Provider Specialty

Family Medicine

Internal Medicine

Obstetrics & Gynecology

Physical Medicine & Reha...

Radiology

Insurer

Commercial

Medicaid

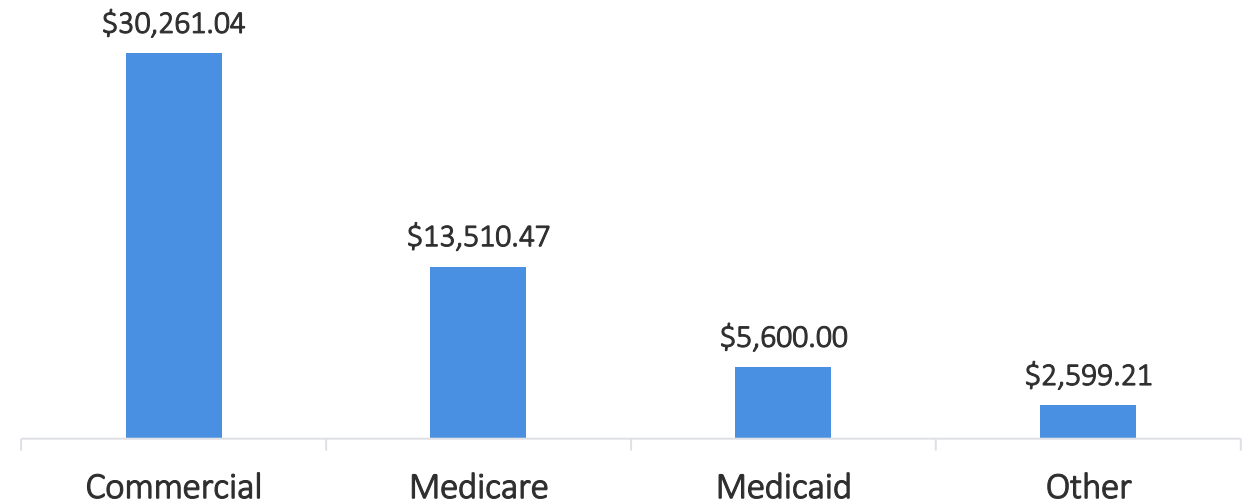

Medicare

Other

INSIGHTS

- Commercial Insurance contributes the largest share of outstanding receivables
- Medicare and Medicaid record significantly lower unpaid balances compared to Commercial providers
- High outstanding balances negatively impact hospital cashflow and revenue cycle efficiency

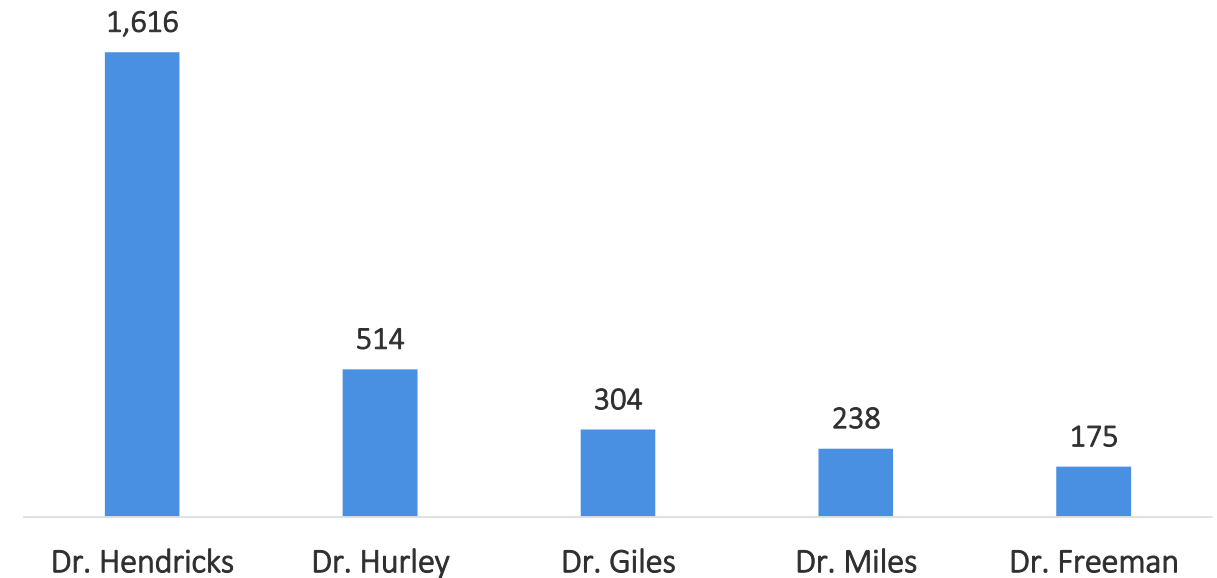

Total amount owed per insurer

INSIGHTS

- Dr Hendricks significantly outperforms other physicians in total procedures and patient interactions.
- There is a wide gap between top physician and the remaining providers
- The workload concentration will increase the risk of physician burnout and operational dependency

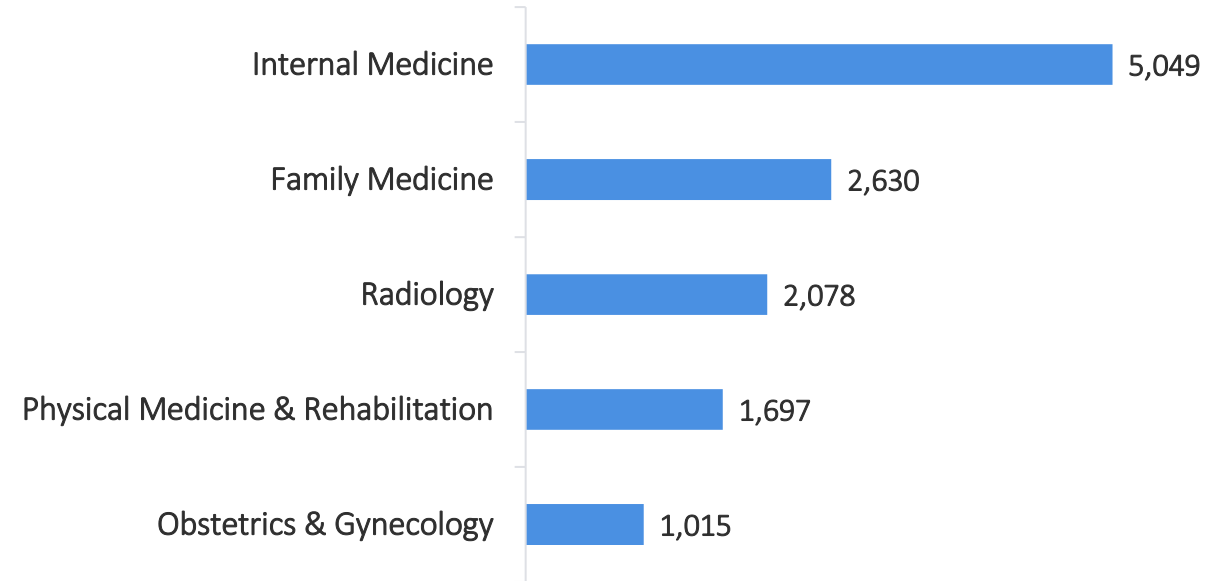

Top 5 performing physicians

INSIGHTS

- Internal Medicine records the highest number of procedures, making it the hospital's primary operational driver
- Family Medicine and Radiology also contribute strongly to overall patient care services
- The procedure trend shows greater demand for general and chronic healthcare services than specialized treatments

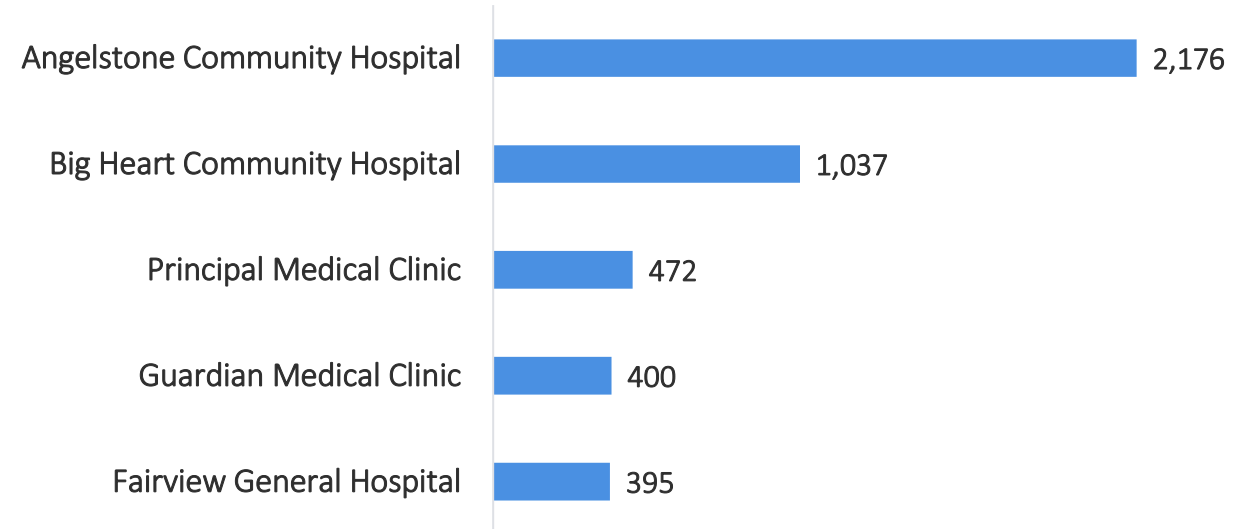

Top Performed Procedures

INSIGHTS

- Anglestone Community hospital handles the highest patient volume across all healthcare facilities
- Patient visits are unevenly distributed among hospitals, with smaller facilities serving significantly fewer patients
- High patient concentration at Angleston shows stronger service capacity and patient preference

Location handling the most patients

POLICY RECOMMENDATIONS

- Strengthening revenue management
- Balancing Workload strategies
- Investment in efficient areas
- Patient Distribution across facilities

THANK YOU
